

# USE CASE

## Defect Detection

Visual detection via camera in production line

AI Detection when product QC Failure

### Expected Benefit

- More effective in quality verified
- Detect accuracy at lease to 90%
- Reduce time for product verification process

### Expected Benefit

- More effective and reduce time in counting process
- Detection accuracy at lease to 90%

## Object Counting

Visual detection via camera in production line

## Visual Inspection

### Expected Benefit

- More safety to verify vehicle
- Detection accuracy at lease to 90%
- Reduce time to process

Stress Fractures

Oiled Surfaces

Corrosion of Metal Parts

Missing Parts
